Jim Min
911 Software Inc
1730 S Federal Hwy, #389
Delray Beach, FL 33483
561-392-9606

Dear Jim,

I have reviewed the transaction detail sent by the 911 Software CreditLine using the version 3.03.xx interface to the Valutec host. All transaction types were formatted correctly and received the appropriate response from the host. The following transaction types were not submitted and not certified:

1. Replacing a gift card

The Valutec gift card application in the 911 Software CreditLine using the version 3.03.xx interface has completed third party certification with the Valutec host, with no known issues or problems. 911 Software CreditLine is being granted the ability to use the Valutec application in its POS systems. Valutec will have only limited support of the gift card application and will not have the ability to troubleshoot the application. This third party certification is for the Gift card program only.

Please let me know if you have any questions or concerns. Thank you.

Sincerely,

Scott August
