Please Note: The only version that can be considered certified, with the above features, is listed in the above paragraph. If another version of the code is installed, into production, WorldPay does not take responsibility; nor will it be held accountable for any adverse results, due to the code. The vendor is then required to submit written notification, to WorldPay, of any changes that will affect the processing of this software. At that time, WorldPay will determine if a new certification will be required. **The Vendor acknowledges a beta period of at least two weeks must be implemented before official rollout to all locations.**

Sincerely,

Nathan Raymer
